sparticular field ranks equally with the attainments of Florence Nightingale, Elizabeth Pry, and other great women of the world.

Agnes Weston began her charity work early in life and along various paths, but it was through a rather interesting in circumstance that she came to take up that line during which, through most of her years, she was so closely identified to bettering, morally and spiritually, of sailors. In the early part of 188 she words a letter to a Christian soldier, then on passage with his regiment from England to India. He read it and reread it, and finding comfort and help from its words of Christian sympathy, he showed it to a seaman. The seaman's eyes glistened as he handed it back with the remark: "That is good; we poor fellows have no friend. Do you think that lady would write to me? I would give anything to receive a letter like this."

This little incident was communicated to Miss Weston. She wrote to the sailors, and that letter was the germ of all her work in the service. Her letter to the seaman brought a grateful reply, including the names of many sailors who would be glad to receive letters. Every week the correspondence grew larger. She made friendships with hundreds of bluejackets in this simple way. "We name of the sailors about and cares for us."

The demand for letters became so great that Miss Weston was obliged to supplement the man of the circulation increased so no open a month were sent to individual men, and the circulation increased so popen a month were sent to individual men, and the circulation increased so popen a month were sent to individual men, and the circulation increased so popen a month were sent to individual men, and the circulation increased so no of the sailors work before the monthly field of work before the morth.
